ANNUAL REPORT 2017-2018

Annual reports contain written description of our activities.

I am very happy to present the annual report in the financial year 2017-2018. Sevai- Society is a registered Non-Profit organization working for rural poor. Almost all rural masses are below the poverty line. So our concentration showed be that people.

Annual report and accounts at the end of its financial year. Accounts provide a financial picture of your groups work over the course of the year, while annual report contains a written description of our activities.

The major emphasis of Sevai-Society is the overall development of the rural poor in the aspects of Socio-economic is ever grateful to all the stake holders, Staff Volunteers, Participants and others. I hope that success will be got through all over likeminded Stake Holders and people.

CHILD AWARENESS PROGRAM:

It aims to create a basic awareness about the key issues, in a relation to child protection. It is suitable for volunteers and staff members in youth work organization.

The new media have specific criteria for determining what is worth covering. By planning effective and news worthy activities, communities can help promote healthy parenting practices, child safety skills and protocols for reporting suspected maltreatment.

Each and every parent are known to our children health, education and their food in each and every age movement these are all activities are explained through village training children awareness in each and every village of our locality.

COMMUNITY DEVELOPMENT PROGRAM:

The community development projects are aimed at help in the villages in planning and development activities, through these projects, schemes for improving the agriculture production and also other activities are undertaken.

An important objective of community development project is to make village people self- dependent and encourage them to take part in the activities of national reconstruction.

- Changing the traditional and conservative outlook of the village people
- Organizing youth and women bodies to take part in the development and welfare activities.
- Making arrangement for recreation of the village youth and women
- Providing educational facilities in village
- Arranging centers of social education
- Arranging recreation programs
- Training village people in the activities of planning and development

Through the community development projects, village people are also given training in administrative activities through the working of community development projects, people are trained in the practical working of democracy the village people are trained in the area of civic affairs

DRUG AWARENESS PROGRAM:

Adolescent and young adult alcohol and other drug use is a serious problems, not just legally, but developmentally. There are the obvious problems of how alcohol and other drugs affect the individual using them, but there's also the friends and family of the using individuals and the community at large.

Substances abuse and drug depending problems of significant proportion in our society today. They are the leading causes of preventable illness, disability and death in the United States. Alcohol is a chemical depending is a disease that affects not only individuals but every component of the family, the workplace and the community chemical abuse not only includes alcohol and villages drugs, but also prescription drugs such as pain medicines sleeping pills etc.

IMPACT OF FAMILY:

Families are gravely affected by a chemically abusing member. Some of the effects on the family may include feelings of insecurity, guilt fear, isolation anger and resentment. As the chemically dependent person disease progresses, the effects on the family worker, jobs and homes may be lost, the person may turn to criminal activities to support the addiction and families often disintegrate. Domestic violence is common under these circumstances.

For students, assistance and integration concerning substances abuse and its treatment may be obtained from the counselor's office.

These are explained and done each and every most affected area.

ENTREPRENEURS AWARENESS PROGRAM:

- Use Policies as instruments for inspiration
- Evidence base entrepreneurial mind set activities
- Share inspirational awareness and know - how.
- Target height potential groups.

Changing mindset is a long term challenge and since policies are the long term commitments and statement of intent that regions, municipalities or organization make they are important instruments for changing mind set.

Each and every person were participated in this program from our area.

GLOBAL WARMING PROGRAM:

In the recent years global warming has taken an increasing prominent role in the international society.

Global warming is of increasing average surface temperature of the earth over the part one to two centuries. Then concept is related to the move general phenomenon of climate change.

Use of the most generation climate change, simply one of the attribution of climate change.

Climate change can be viewed as consisting of two components one of which is human in origin and condition in timing with industrial period of the part two continues and other of which is nature and has played a role in both and current climate variability.

ENERGY BALANCE:

The average surface temperature of the earth is maintained by a balance between incoming and outgoing sources of energy or radiation.

Global Warming is projected to have a number of effects on the oceans ongoing effect include rising sea levels due to thermal expansion and melting of glaciers and ice sheets, and warming of the ocean's surface, leading to increased temperature.

Regional effects of global warming vary in nature. Some are the results of a generalized global change, such as rising temperature, resulting local effects.

In Arctic, Africa, small islands and Asian regions mega deltas are regional that are likely to be especially affected by climate change.

Some evidence suggests that droughts have been occurring more frequently because of global warming.

So people must co-operate to rising the temperature to avoid Deforestation, Pollution as like.

HIV/AIDS AWARENESS PROGRAM:

The Department of AIDS Control under national AIDS Control program has developed communication strategy to create awareness about HIV/AIDS and promote safe behaviors among vulnerable sections of people in all parts of the country.

Mostly Concentrated on vulnerabilities of high risk groups including commercial sex workers, men having sex with men, injecting drug users and also truck drivers and migrates are specially addressed through behavior change communication programs.

This awareness program helpful to avoid HIV/AIDS in remote village people.

SHG FARMERS AWARENESS PROGRAM:

SHG farmers group are most powerful to organic farmers into groups and integrate them into the development process by activity involving them in transfer of technology, production and marketing, planning, implementing and monitoring of different projects on rural development, agriculture and allied sector development, natural resources management. Etc

National commission on farmers, ministry of agriculture and draft national policy of farmers has indicated the following aspects of group approach.

By self-help groups has been mainly organized for supporting micro-enterprises operated by women with the help of micro-credit, with the growing diminution in the size of operational holdings, it will be useful to promote SHGs at the production end of the farming enterprises involving men. This will be particularly helpful in the case of integrated pest management, integrated nutrient supply, scientific water management improved post-harvest technology marketing etc. Farmers organization of all types have an important role in development.

LEGAL AWARENESS PROGRAM:

Legal awareness sometimes called public legal education is the empowerment of individuals regarding issues involving the law.

Public legal education sometimes called civics education. Legal awareness can empower people to demand justice, accountability and effects remedies at all levels.

LIST OF POSITIVE OBJECTIVES:

- Raising awareness and building capacity
- Training of trainers
- Community education and legal empowerment.
- Exposing law students to social justice work
- Strengthening community solidarity and supporting grass-roots advocacy methods to adopt to promote legal awareness.

Legal awareness is also achieved through camps, lectures and interactive workshops or crash program on the essential and elementary legal laws.

Other methods are radio talks, street and theatre plays as well as the publication of relevant books, periodicals, posters and charts that deal with particulars laws. At the elementary level, usually minimum level of legal literacy introduction is taught through civics, but which is not necessarily adequate for the rent of life.

So, Legal awareness is very much important to rural public.

CHILD LABOUR AWARENESS PROGRAM:

Child Labour is an abuse of children's rights and it is vast and urgent problems all around the world. As child labour is so widespread. So complex, the only way we can put a stop to it is to all act together. The first thing we can do in our community in our region to take action and get involved in the fight against child labour.

Child labours are mostly in agriculture, child labour in domestic work, Communal sexual exploitation of children, Migration and child labour resources on migration and child labour, Mining and quarrying.

The majority of working children are concentrated in the rural areas. So, these are all eradicated by like these awareness programs.

SUSTAINABLE AGRICULTURE:

To increase public awareness about and engagement with sustainability principles and sustainable living.

To develop sustainability answers that are scalable extending benefits to the wider economy.

The green revolution of the 60s and 70s produced immense gains in food cereal production in the third world. There are huge problems in post revelatory. Farmers with small or marginal holdings have benefited less than wealthier farmers.

Emerging evidence for the success on farms of resource conserving technologies and practices must not tempt agricultural professional into making prescriptions about what constitutes sustainable agriculture sustainability is a complex and contented concept.

Agriculture production provides income, employment and food at affordable prices as well as raw materials for the processing in during and foreign exchange from exports. Creating a sustainable agriculture development path means improving the quality of life in rural areas ensuring enough food for present and future generation and generating sufficient income for farmers.

Supporting sustainable agricultural development also involves ensuring and maintaining productive capacity for the future and increasing productivity without damaging the environment, natural-resources.

Economic and environmental sustainability, adequate farmer income, productivity capacity for the future, improved food security and social sustainability are important elements of developing countries agricultural development.

The livestock sector contributes to economic and social development as well as food security. Due to its positive interrelations with agriculture production livestock production is generally an integral part of farming systems.

The importance of Agriculture and types are taught to rural poor.

ANIMAL HEALTH AWARENESS PROGRAM:

Monitoring animal health and preventing animal disease outbreaks is vital to the economy and safety of the countries food supply production of healthy livestock helps to ensure a safe and safety and keep consumer prices stable.

Animal health was a UK government executive agency primarily responsible for ensuring that farmed animals in Great Britain healthy, disease free and well looked after.

It was designed to promote community appreciation of the close association between animal and human and the benefits of basic animal health care.

We are delighted to involve new veterinary graduates and veterinary students in this program.

SUGAR AWARENESS PROGRAM:

Action on sugar is a group of specialists concerned with sugar and its effect on health. Its successfully working to reach a consensus with the food industry and government over the harmful effects of a high sugar diet and bring about a reduction in the amount of sugar in processed food.

Reasons why sugar is bad for your health

- Sugar causes glucose levels to spike and plummet.....
- Sugar increases the risk of obesity, diabetes and heart diseases.
- Your immune Function can be affected by sugar.
- Sugar acceleration aging.
- Sugar causes tooth decay.
- An abundance of added sugar may cause liver to become resistant to insulin, an important hormone that helps to turn sugar in your bloodstream into energy.

This means your body is not able to control your blood sugar levels as well, which can lead to type 2 diabetes.

STAFF TRAINING PROGRAM:

There are many methods of training are there. We mainly prefer input-session method, group discussion, case study like that.

INPUT SESSION:

Our resource person gave training to STAFF members difficulties, how to face, how to solve the problems. Knowledge improvement sessions, study materials issued.

The forms of training with technology are almost unlimited. A trainer also gets more of the learners involvement them in any other environment and trainees have the benefit of learning at their own pace.

On-the-job training gives volunteers and employees motivation to start the job. Some reports indicate that people learn more.

Coaching/Monitoring gives employees a chance to receive training one-on-one from an experienced professional. This usually takes place after another more formal process has taken place to expand formal process has taken place to expand on what trainees have already learned

STAFF training is very much important to growing needs of society.

WOMEN EMPOWERMENT PROGRAM:

Empowering women as an essential part of lifting improvises communities we have transformed thousands of lives through evidence based programs that focus on expanding women's economic opportunities, increasing women's rights and security and advancing women's politician participation.

International volunteers HQs treated women's empowerment programs provide volunteers with the opportunity to reduce social inequalities and help tackle women's rights issues by increasing access to education and vocational training opportunities for women.

Many women and girls living in the communities we support face a wide range of social inequalities and often don't have chance to complete their

education or gain financial independence. Our volunteers work will contribute to the long term goal of assisting social change and creating an inclusive society in which women have equal rights and are able to access education, health care and employment opportunities.

Volunteer work can also include empowering women through building confidence, developing financial independence, fostering entrepreneurship skills, and growing strong female leadership.

Women empowerment is most important to nation economic development and income should fulfill in economic activity. That is most powerful to national economic activity and development.

ORGANIC FARMERS AWARENESS PROGRAM:

Organic farming is very much important to farmers and farming activities. It will develop yield and maintain soil goodness.

We gave training to organic farming activities to farmers in the area.

- Importance of organic farming.
- Organic Farming v/s Chemical farming.
- Basic concepts of organic farming.
- Minerals elements essential for plants.
- Testing the quality of soil and its management.
- Proper handling of farm waste and household waste.
- Harvesting and storage of organic products,
- Making of project reports and bank loan process.
- Marketing of organic products.
- Economic viability of organic farming.
- Achievement Motivation.
- Visit to organic farmer fields& vermin compost unit.

CONSUMER AWARENESS PROGRAM:

A Consumer is a person who consumes or uses any goods or services. Goods may be consumables like wheat flour, salt, sugar, fruit, etc., or durable items like television, refrigerator, toaster, mixer, bicycle etc. Services refer to items like electricity, cooking gas, telephone, transportation, film show etc. Normally it is the consumption or use of goods and services that makes the person to be called as 'consumer'. But in the eyes of law, both the person who buys any goods or hires any service for consideration and the one who uses such goods and services with the approval of the buyer and termed as consumers.(i.e) when father buys apples for his son but son only consume the apple but both are treated as

consumer. However, a person who buys goods for resale or for any commercial purpose is not treated as consumer.

Under the consumer protection Act 1986, the word consumer has been defined separately for the purpose of goods and service.

QUALITY STANDARDS:

- Sales of duplicate goods.
- Use of false weights and measures leading to underweight to security.
- Changing more than the MRP
- Supply of defective goods.
- Supply of inferior Services, quality of service lower than the quality agreed upon.

The Consumers are becoming more mature and conscious of their rights against the malpractices by the business. Although many consumers organization who are making efforts to build consumer awareness, our who take most part of this area.

TREE PLANTATION PROGRAM:

The need for tree plantation has become even greater these days because of the growing pollution in the environment. Tree plantation involves transplanting tree seedlings to grow forests and spread greenery around.

Tree plantation is good for the environment. Every one know that trees are the source of oxygen. They inhale carbon dioxide and exhale oxygen without which the survival of living beings is not possible on earth.

Apart from inhaling carbon di oxide trees also absorb harmful gases including sulfur di-oxide and carbon monoxide and also filter harmful pollutants from the atmosphere there by providing fresher and cleaner air to health. The growing amount of air pollution caused y the smoke mitted by vehicles ad factories can be controlled only if we plant more and more trees

It offers several there benefit some of the top advantages.

- Providing fruit ad leaves that serve as food for birds, animals as well as human beings.
- Maintain bio-diversity
- Providing wood, rubber and other raw material that are used for manufacturing various goods such as furniture, doors, windows, utensils stationery items and decorative items.
- Conservation of water.

- Habitat for birds and animals
- Climate control
- Preservation of soil

We are cutting these trees ruthlessly. Tree plantation is essential to compensate for the loss. These use mainly described group to group and almost all our working villages.

Milky animal to family female children only We motivate the genius equality importance are given to female child family.

Got are given distribute elderly person. Elder persons. In the past decade the elderly population in TamilNadu was a percent, which in 2011, It has increased to 11.2(2.2% growth)

So they are affected by even their livelihood demand So they are concentrated by our project.

CONCLUSION:

Writing a conclusion is an importance part of any piece of writing. It is often possible to get a good overview of an assignment by working briefly at the conclusion. However writing a conclusion can be quite difficult, this is because it can often be hard to find something interesting or useful to say in conclusion.

Everything comes out with the co-operation of members, Volunteers, donors, Bankers and all other state holders with STAFF members of our society.

Sevai-society is extended their grateful thanks to those who were working (are working) with us to full fill our needs to rural people.
